Instructions For Afterglow Headset

Read/Download
The Afterglow Fener, by PDP, is a stylish and comfortable addition to your gaming setup. There are three critical features:

1. The first thing I noticed was how light they are, relative to other headsets, such as the Turtle Beach Ear Force K12. This allows for more comfortable wear.
2. With the Afterglow headset, you will be able to enhance your gaming setup with digital and analog outputs and trademark Afterglow lighting.

He helped us out big time when we wanted to get set up in the Boynton PDP Afterglow headset. Instructions were pretty clear to me and showed three ways to hook it up. The wireless chat device is styled like a typical Bluetooth headset and donned with the Afterglow branding. The communicator sports a 10mm audio driver.
